

METHOD AND SYSTEM FOR DUAL OR MULTIPLE ENERGY IMAGING

Abstract of Disclosure

A method minimizing artifacts in dual or multiple energy images includes: obtaining first and second offset images from a detector after obtaining first and second exposure image data sets from the detector. Other embodiments include: changing the dosage of the exposures, changing the gain of the detector, changing the pixel acquisition resolution of the detector, and leaving the detector unscrubbed between the first and second read times.

Figures

Figure 1: A line graph showing the relationship between the number of hours spent studying and the score on a test. The x-axis represents 'Hours Studied' (0 to 10) and the y-axis represents 'Test Score' (0 to 100). The data points are as follows:

Hours Studied	Test Score
0	55
1	60
2	65
3	70
4	75
5	80
6	85
7	90
8	95
9	100
10	100

The graph shows a positive correlation between study hours and test scores, with the score increasing from 55 at 0 hours to 100 at 10 hours.
